

Capital Community Broadcasting, Inc. operates public radio station KTOO-FM in Juneau, Alaska. We strongly support HD Radio and the authorization of the supplemental audio channel. Juneau has only 7 radio signals available, and only one public radio signal. The audience would benefit from a variety of new program services we could offer on the sac, including live coverage of the Alaska State Legislature, broadcasts of civic and school meetings, programming for Native Alaskans, University of Alaska programs, additional news and public affairs programs and more public service. KTOO has considered applying for a new FM frequency, but the costs to construct an entirely new facility are prohibitive. The sac offers a wonderful opportunity to greatly expand public service program offerings.
